

APOLLO REACH HOSPITALS, KARIMNAGAR

“REVAMPED”

FROM Venkata Girija Rao (Patient))

GOOD MORNING TO ALL.

Mr. Venkata Girija Rao age 76/male going the life the best, can . I am a known case of HTN, Hypothyroidism and Renal dysfunction. So my movements were limited to say the least. The good Lord was been good to me and I was breezing through life as well as I could. Imagine my shock that on 21/1/22 I developed chest pain associated with sweating, felt nauseous and was in pain. I was rushed to the Apollo reach hospital, when the ER doctors took good care of me and treated me and stabilized .Then cardiologist was advised for angiogram. The Angiogram test shows three blood vessels completely blocked, and my dickey ticker would likely to have ceased very soon without any option. The kindly CT Surgeon came next and assessed me and kept about the need of the surgery at the earliest possible. The Anesthetic team came next and checked my fitness for surgery. Our belief in the almighty has gone up by miles and we were praying to the duties known and unknown, my Family made a lot of promises to the duties to watch over me. on 26/1/22 I underwent triple bypass graft surgery . by the grace of god the whole procedure went according to plan. I made a good recovery and was able to breathe easily, I am very thankful to Ct Surgeon and entire team, and Staff who helped me to make excellent recovery.
